Team,

Please find attached the draft (v1) report for ASPECT data collected on 18 March 2019. Please note that compounds detected included 1-butene, 2-butene, isoprene and acetone. All were low with the highest concentration just above 1 ppm.

Current plans are to have the aircraft over the site at 0900 on 19 March 2019 to provide data products by 1100.

Please let me know if you have any questions.
